

OGHP-8K MULTI-PURPOSE HIGH PRESSURE HOSE (552 bar WP)

CONSTRUCTION Inner liner of synthetic oil resistance, multiple steel wire reinforcements wrapped in alternating directions and an oil and weather resistant synthetic rubber cover. It is not designed as a rotary drilling or vibrator hose and is predominantly used to transfer high pressure water and drilling muds around the fracking space.

APPLICATIONS Used with hydraulic oil, fuel oil, lubrication oil, emulsified liquids, drilling fluids, cementing. it is useful as cementing hose stored on hose reels due to it's tight bending radius

TEMPERATURE Working temperature range within -40°C to 100°C

FITTINGS: Special manufactured integral Fig 1502 and NPT male crimp fittings.

NB (mm)	OD (mm)	WP (bar)	BP (bar)	BEND RADIUS (mm)	WEIGHT (kg/m)
51.1	71.6	552	1380	640	5.5

Note: Other sizes and pressures available on request.
