

TESSALINK HOSE & IRONWORKS ASSET INTEGRITY

TESSALink helps you do more, work smarter and improve safety. Bolstered with hose industry content, forms and Ironworks templates, your team can transition to a digital tracking solution in no time.

"How would you like to find your hoses and hammer unions remotely using your mobile phone?"

"And receive an automatic email when your hoses and Ironworks are due for inspections or testing or replacement or maintenance?"

IDENTIFY

Leverage RFID for accurate immediate identification

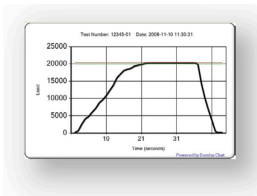

INSPECT

Mobile apps with industry prefill forms drive more inspections in less time.

NATA PRESSURE, ELECTRICAL & VACUUM TEST

Build test cert & perform digital tests in one step. Upload certs to the cloud.

REORDER OR REQUISITION

Request hose from smartphone with specifics & deliver information

SHARE

Distributors & end users help input hose detail into ecosystem database. Industry prefill content.

SCHEDULE

Multiple tasks per hose on a calendar or condition. Email overdue alerts to designated user teams.

REPORT & SCHEDULE

By inspection, failure or repairs. Customize by product class or audience. Schedule tasks to asset by date or condition. Email alerts to user teams.

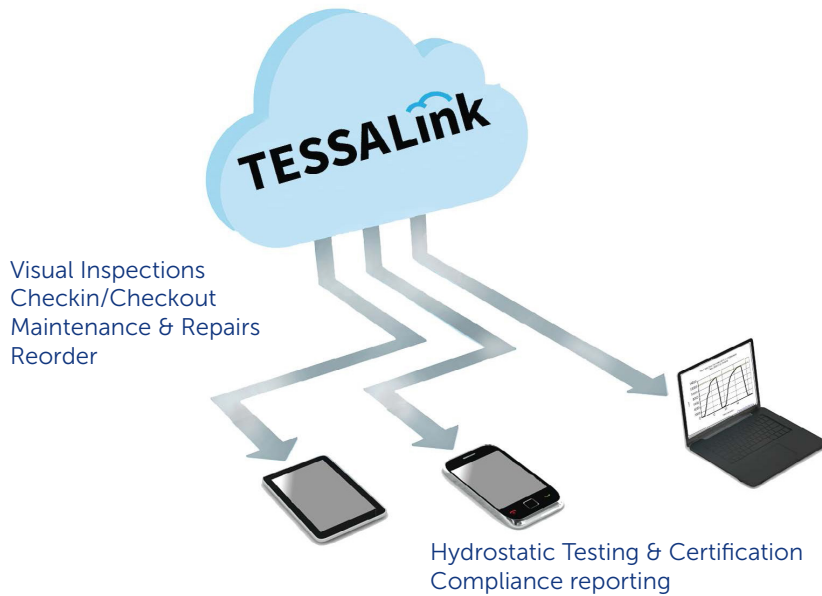

PREDICT & CONDITION MONITOR

Hose lifespan analysis, brand comparison, inventory & failure prevention.

HOSE-SPECIFIC
